Education

2011 – 2014 **School of Computer, South China Normal University**, *Master Student(guaranteed admission)*, Computer Application Technology.

2007 – 2011 **School of Computer, South China Normal University**, *Bachelor Student*, Network Project.

Skills

Languages	Vibe Coding, Python, C/C++, Java, Shell/Bash, ECMAScript	Operating Systems	Linux, Windows, Mac
English Proficiency	CET6(513)	Development Tools	Codex, Claude Code, Emacs, Android Studio, Git, Makefile, gdb
Documentation	LaTeX, Doxygen, Markdown	Unit Test	minunit, nose, doctest
Tech Stack	Android, Cocos, Unity, React	AI	Agent, RAG, fine-tuning, eval loop

Experience

Career Experience

2017 – **Tencent™**, *Tech Expert / Lead of Algorithm Group I.*

- Tech owner of Qrobot (2nd gen), Tencent ABCmouse, QQ Mini Programs, QQ Bots and multiple overseas projects (M8, M8 Lord, M9, W, *etc.*); currently algorithm owner of the XiaoQ AI assistant, owner of AI scenario exploration in QQ Technology Committee, and lead of Algorithm Group I — managing 7 algorithm and 6 engineering members.
- Tech owner of *QPilot*, QQ's AI Agent platform — algorithms, architecture, product and operations; built v1.0 from scratch with a 5-person team; now QQ's one-stop AI foundation: self-developed the QPilot model family — **funcall** tool-calling model (CoT + SFT + DPO), single-turn accuracy 87.22%→95.49% and multi-turn 65.31%→90.81% on business benchmarks; **wiki** knowledge-base Q&A (the earliest in-house iWiki RAG solution), pass rate 62%→98%, 480k+ knowledge-base Q&A and 2,890 derived assistants; **code** Chinese coding model, incremental pre-training brought ArkTS (HarmonyOS) completion to SOTA and lifted AICR review positive-feedback rate 8.55%→49.85% across 600+ projects and 610k CR tasks; designed the Ops architecture of "multiple creation views + one unified API" to avoid experience breakage across models: 270M+ API calls in 2024, covering 845 departments / 2,674 teams with 6,500+ public agents.
- Tech owner and architect of Tencent ABCmouse (2018–2021): led the rewrite of the top-selling US English-learning app for kids (30+ scenes, 7,000+ learning activities) from a Hybrid architecture to a high-performance Cocos-based cross-platform solution covering iOS, Android, Web and WeChat Mini Games; scenario-based migration (video scenes to native, games to H5, the rest to Cocos); diagnosed and fixed a Cocos engine `callStaticMethod` cross-layer JNI reference leak that froze the app (official PR #1178, merged upstream); in-house hybrid texture compression (PVR/ETC2) cut per-texture memory by 75%∼87.5% and total memory 180MB→50MB; incremental compression tooling fixed the build-time cost, and a reference-counting reclaimer fixed resource mis-release on scene switches; built an end-to-end monitoring system (JS exception interception, daily alarms, remote log fetching and hot updates); delivered shared UI components, a cross-platform AudioPlayer, a high-performance ScrollView and the `abchelper` one-stop project management tool. Results: scene loading 10s→1s, iOS package 400MB→250MB and Android 150MB→100MB.
- 17 patents, 75 KM articles and 428 iWiki docs, with KM technical influence over 99%; Tencent Excellent R&D Award, Domain Outstanding Project Award and Technical Influence Award.
- Speaker of GMTC 2018; lecturer of 8 Tencent Class courses and member of the Tencent Class "Xinxuan" course-rating expert panel (client-side channel owner).

2015 – 2017 **Pingan™**, *Senior Android Developer.*

- Core developer of *Hyperion*, a cross-platform mobile developing framework.
- Studies involves hybrid app caching, react-native hot updating, enterprise level code managing, *etc.*

2014 – 2015 **Baidu™**, *Software Development Engineer in Test.*

- Main developer for GodEyes-iOS, a static language crash analyzer for iOS APP.
- Wrote foundation tools for map testing *e.g.* map format checker, svn watcher, flow analyzer, *etc.*

Scientific Experience

2009 – 2013

Shenzhen Institute of Advanced Technology, *Intern Student*.
Doing scientific research.

- Studied texture weathering, motion clustering, shape retrieval, *etc.*
- Published 5 papers. Applied 1 Patent.
- Gained intern student scholarships.

Community Experience

2018 – 2021

Cocos, *Community KOL / Core PMC*.

- Coordinated multiple in-house teams to build cocomat, a high-performance, reusable Cocos Creator component framework shared across businesses, and open-sourced it to the Cocos community.
- Fixed a JSB cross-layer memory leak upstream in Cocos (PR #1178).
- Cocos community KOL & 10th-anniversary honorary speaker; speaker of Cocos Developer Salon 2020.
- Core PMC of Tencent Cocos Oteam.

Open-source Experience

2017 – present

wukong-robot, *Author*.

- **Abstract**: A simple, flexible and elegant Chinese voice-dialogue robot / smart speaker, with LLM powered multi-turn conversation — probably the first open-source smart speaker project supporting brain-computer interaction. Works out of the box on Raspberry Pi and many other platforms.
- **Features**: Highly modularize and extensible. You can switch ASR engine and TTS engine simply by modify the config file, and you can easily write your own skills to extend the ability of the robot. Supports Muse headset-based brain-computer wake-up. Allows controlling you smart devices with HomeAssistant. A backend server is also provided, with open restful APIs.
- **Stats**: 7,100+ stars, 1,400+ forks, 175 watchers. Clips of the code were featured in a hit TV series.

2013 – 2014

QtEVM, *Author*.

- **Abstract**: Open source implementation for EVM(Eulerian Video Magnification).
- **Features**: The first open-source completed C++ implementation for EVM, which supports both motion and color magnification.
- **Stats**: 178 stars, 67 forks.

2013 – 2014

hexo-theme-freemind, *Author*.

- **Abstract**: One of the most popular theme for Hexo.
- **Features**: Luxuriant tag plugins so as to get the power of Twitter Bootstrap with minimal hassle.
- **Stats**: 411 stars, 145 forks.

Awards

2017 – present

Outstanding Employee Award (×7), **Outstanding Performance Award** (×4), **Excellent R&D Award, Domain Outstanding Project Award, Technical Influence Award (individual), User Reputation Award, Code Leap Award, Social-line STAR Award** (×2), **PGM Flash Award "Super Coding Power Award", SNG "Super Ma-Li" Award, multiple BG-level / department-level project awards**, *Tencent*.

2015 – 2016

Annual Outstanding Employee, Distinguished Contribution Award, "Innovation Employee" Award, Bi-weekly Innovation Award, Project Award (×1), **Tool Award** (×2), **Innovation Award** (×4), *Pingan*.

2011 – 2013

National Scholarship, Silver Prize of the 12th "Challenge Cup" National College Students' Academic Science & Technology Competition, Outstanding Graduate & Outstanding Dissertation, *National / University*.

2008 – 2012

1st Grade Scholarship(× 2), **2nd Grade Scholarship**(× 2), **Innovation Scholarship**, *South China Normal University*.
